AHDCL

DynamicCL

Motorized lift for tabletop cameras

Bring the camera to the conversation. Retract it into the meeting table when it is no longer needed.

Camera concealment
DynamicCL raises a tabletop camera for meetings and retracts it inside the table after use, freeing the surface for other activities.

Smooth quiet movement
A smooth, almost silent lift motion brings discreet camera integration to meeting rooms and boardrooms.

Touch or remote control
Raise and retract the camera with the capacitive touch button on the cover plate, or control it remotely via RS-422/RS-485 Full Duplex.

Finish to suit the table
The black coated steel cover plate provides a discreet tabletop finish. Other colours are available upon request.

Anti-pinch protection
Integrated protection helps reduce the risk of fingers or objects becoming trapped during lift operation.

Raised with Neat Center.
Also compatible with cameras from other brands.
