# DynamicTalkH

Universal motorised horizontal lift system for "gooseneck" microphones

FEATURES

- Adapts to 40 cm length microphones
- Low space required underneath the table
- Dynamic LED to indicate microphone's status

- Maintenance free
- Serial control & Remote diagnose

GENERAL

DynamicTalkH microphone lifts have been designed for installation into tables or desks.

DynamicTalkH is a horizontal lift for gooseneck microphones. The system has been specially developed to optimize the space underneath the table where it will be installed; room for legs won't be a problem any longer. Silent, remotely controllable and yet elegant, reliable and easy to install, it's easy to install and can be veneered to match table's surface. The system allows the microphone to be bended and it automatically takes it back to its original horizontal position.

DynamicTalkH not only makes the microphone disappear within the desk surface but it also provides a pleasant interior light to indicate its status (the light can change from red to green). Microphones are safely stored and protected and the meeting and conference rooms become versatile to be used for different purposes.

DynamicTalkH has 2 different working modes; PA and Conference. When in PA mode, a push button placed on the cover plate, allows to activate or de-activate the microphone. A LED light ring will indicate the status by changing colour, from green to red. The system will silence the microphone when this is in retracted position. When in Conference mode, the microphone will always be active and both the light ring and the access to the push button on the cover plate will be available through a connector (GPI/GPO). In this mode, the system is ready to be connected and controlled through a conference system.

Technical Specifications

DynamicTalk Control	
Up/Down Control	GPI contact closer
	RS-422 (RJ45 CAT 5)
Microphone control	Button on upper cover plate
GPI/O	LEDs control and switch

Electrical	
External power supplies	100-240Vac, 50/60Hz, 12Vdc
Power consumption	20W

Mechanical	
Dimensions	134 x 544 x 144 mm [5.2''x21.4'x5.6'']
Weight	9 Kg / 19.8 lbs
Shipping Dimensions:	
Weight	10 Kg / 22 lbs
Shipping Box	202 x 622 x 212 mm

Options

• USB integrated on cover plate
• USB power integrated on cover plate
• Customised cover plate with speaker, voting system, conference system
• Customised laser engraved logotype on the cover plate

• Custom microphone connection
• Anodisation in different colours

Certifications
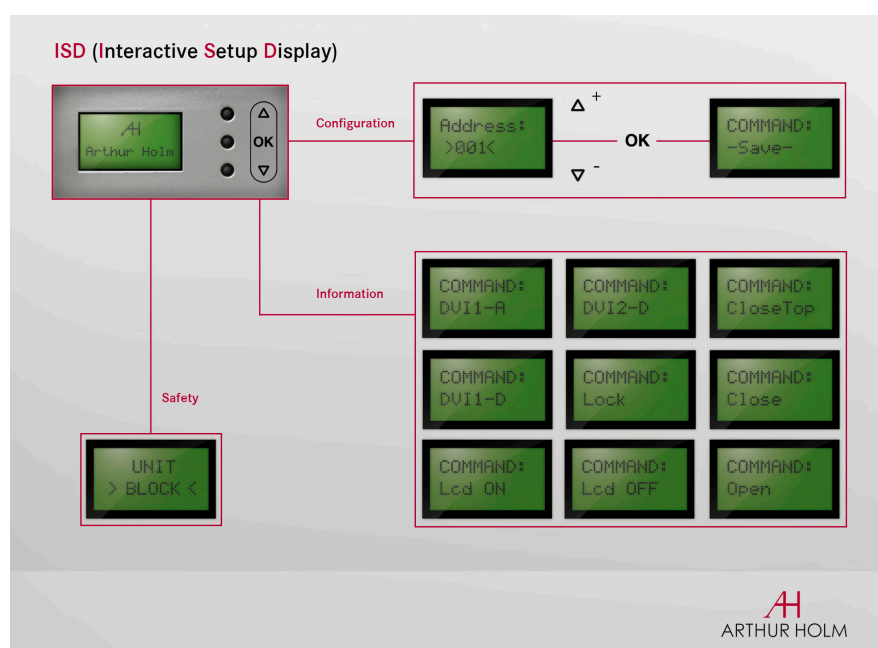

• CE

Warranty

• 2 years general warranty
