

AH2

HDCP compliant aluminium manually foldable monitor

FEATURES

- Milled anodised aluminium monitor
- Manually foldable from 0 to 110°
- Totally adjustable position
- Ready for desk mounting
- Maintenance free
- Energy saving design, low consumption video controller

GENERAL

Arthur Holm AH2 manually foldable monitors are the perfect solution to create flexible and versatile tables needing to optimise the space. The monitor is fixed to the table surface through its milled aluminium base, allowing the user to adjust the viewing area of the monitor and holding the monitor in a firm working position. All connectors are placed under the table and cables are passed unseen through the base to the monitor, leaving the monitor minimalist design unobstructed.

AH2 are aluminium monitors that can be easily folded down to leave a direct line of sight to the other participants or activities taking place in the room. Furthermore, the low profile space needed for their installation allows users to have a large cable-free surface to work using both the screen and other materials over the desk.
