

ARTHUR HOLM

DynamicVision

Motorised wall mount for videoconference cameras

AHDV01 / AHDV02

FEATURES

- Motorised wall mount for videoconference cameras
- AHDV01: Upward moving cover
- AHDV02: Downward moving cover
- Compatible with the most popular videoconference cameras
- Cover for veneering
- RS-422 and Infrared controllable
- Easy to install

GENERAL

DynamicVision is an efficient motorised solution to hide videoconference cameras and improving the room design. The DynamicVision is designed to be adapted to the room décor. Its fabric mounting system allows an easy mount of the fabric of your choice onsite. The DynamicVision can also be veneered with a maximum veneer load of 2.5kg/ 5.5lb. The camera enclosure is controllable through RS-422 (AHnet) and Infrared. AHLINK to diagnose and configure the unit.

DynamicVision provides the ideal solution to conceal videoconference cameras while improving the interior design of the conference room with its easily adaptable front enclosure that can be covered with various materials. The pre-installation frame is the perfect solution for coordination between system integrators and architects or constructors.

The camera enclosure is activated via RS-422 and infrared. AHLINK to diagnose and configure the unit. It neatly stores the camera away when not required, both protecting the camera and securing the work environment. The front enclosure moves vertically to expose the camera while moving the camera moves forward simultaneously to free the camera lines from the enclosure. DynamicVision is the perfect solution for system integrators, architects, interior designers and space planners.
