GENERAL

Arthur Holm's DB2 is a new retractable monitor range that creates minimum impact on the furniture design (just 20 mm. of depth): easy to integrate, intuitive to use (one simple operation sensor) and almost invisible (no cover plate, streamlined neatly into the furniture) when not in operation. The monitors are elegant, beautiful from all angles, and discreetly integrated into the meeting room table, disappearing within the desk with a harmonious silent drive.

Completely designed and furnished in anodised aluminium, the range offers a minimal and contemporary look.

Aluminium is a durable surface; it is extremely resilient and it also serves to dissipate heat, plus the anodised finish provides a soft, silky effect. The front anti-reflection double glass protects the screen, reduces the "mirror" effect, increases the contrast and allows for natural transparent colours.

The range is available from 10" to 23.8" and there is a touch screen option (from 10 to 22"). DB2 monitors are remotely controllable and diagnosable through ERT interfaces in an easy and cost-effective way.

ARCHITECT'S SPECIFICATIONS

Retractable Full HD 17.3" screen with 20° of adjustable inclination. Low voltage. Solid aluminium monitor housing (anodised finish), square corner design featuring 2mm. double sided anti-reflective black edged glass. The screen features control sensors to raise, lower and adjust the viewing angle. One sensor is located on the top of the aluminium frame, which is accessible when the monitor is hidden within the table, and another sensor is placed in the front glass of the monitor. DVI-I and DVI-D connectors: HDCP compliant inputs. RS-422 I/O and GPI connector.

Easy to read Interactive Set-Up Display (ISD) 2.2" LCD display, allowing local and remote configuration, operation and troubleshooting without having to remove the monitor from the furniture. When connected to the AH ERT

interface, the assisted addressing system facilitates the address configuration by just simply pressing one button, in an easy and convenient way. Embedded speed and protection pre-sets for quick restore to factory values (enabling a rapid reset to factory values if required). Auto-check feature for auto-diagnostic and internal protection functions. USB port for local firmware upgrade. Safety system that detects obstructions (causing unit to stop).

Adjustable mechanical parameters through AHnet or ISD for calibration and adjustment of mechanics. Adjustable parameters of brightness, contrast and backlight through RS-422. External power supply with 4-Pin XLR4 connector.
