

AH 1

HDCP compliant aluminium manually foldable monitor

FEATURES

- Milled anodised aluminium monitor
- Manually foldable from 0 to 70°
- Totally adjustable position
- No need to modify the desk surface
- USB pass-through
- Maintenance free
- Energy saving design, low consumption video controller

GENERAL

Arthur Holm AH1 are aluminium manually foldable monitors for table top with a natural anodised finish and a black cast iron base. The multifunctional iron base serves for several purposes: the unobstructed base holds firmly the aluminium monitor housing in place and provides a steepless adjustment of the viewing area. Furthermore, the base hides the cable connection and guides the cables unseen away from the monitor when using the cable exit in the centre of the base or, if needed, the rear cable outlet.

The screen position can be easily adjusted from flat on the table to 70° . The monitors include a USB passthrough from the side. AH1 are the ideal solution for auditoriums, telepresence, training rooms, meeting and conference rooms and information counters.
