General

Professional 17.3" motorized retractable monitor that provides silent, reliable, and harmonic movements by a patented solution with only one engine. This automated monitor is equipped with a variable speed system to raise, lower and tilt 20° to ensure the best ergonomics, viewing angle and visibility. The monitor is built in a mechanized solid aluminum block with anodize finish and the cover plate is made of brushed stainless steel. The screen is protected with a double side anti-reflective 3 mm. glass.

The retractable monitor provides 2/DVI-HDCP compliant inputs and is equipped with an Interactive Display allowing its setup, control and diagnose.

The monitor provides RS422/RS485 (I/O), allowing the remote control of the input selection, movements, speeds, safety settings and brightness, contrast, and backlight adjustments.

The monitor can also be adjusted and controlled via a wireless application: AHlink. The AHlink Android and iOS App allows the access to the setup and control menu and to get the serial number and firmware version without removing the monitor from the table. The Auto Mechanical Movement Calibration automatically adjust the speeds and the safety protection parameters. The use of the ERT-30 and ERT-60 enables an automatic individual address configuration of all the monitors in a meeting table.
